

# Say Hi to Smart WiFi

Designed to work with our fibre  
network for an even more powerful  
home internet experience

 Digicel+

# Better WiFi Coverage. Seamless Connections

## Wall-to-Wall WiFi Coverage

With dual-band smart steering, each router is designed to cover up to 30 metres with speeds up to 300Mbps (2.4GHz) and 867Mbps (5GHz); so that you can enjoy superfast fibre speeds on every device in your home - even in those hard to reach areas.

## Single Network Roaming

Our innovative Smart WiFi solution uses a single WiFi Network to keep you better connected as you move seamlessly around your home by finding the best connection for your device so you can worry less about drop-offs in your connection or managing multiple WiFi Networks.

## Automatically Balances WiFi Reliability & Performance

Our innovative solution keeps an eye on your WiFi traffic by reducing interference or congestion by automatically switching connections when needed so each of your devices get the performance they need.

**To get started, contact us and we will send a team to your home to conduct a WiFi assessment and to install your Smart WiFi boosters.**

Smart WiFi Boosters	Price/Month
1st	\$40
Additional Boosters	\$39 each

*\*Available for Digicel fibre internet customers*
